

PLA 9312 3D Adjustable Wall Mount PLB 32xx

Key Benefits

- Easy to align on X-Y-Z axis
- Easy to install

A perfectly aligned LED wall

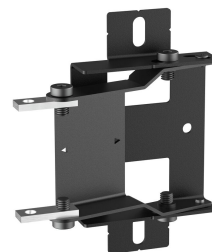

The 3D adjustable wall bracket allows perfect alignment of the dvLED interface bar (PLB 32xx) on which the dvLED panels are installed. Any unevenness in the wall can thereby be smoothed out, this allows for seamless installation of a dvLED wall. The adjustable depth of the wall mount is an impressive 40 mm. The PLA 9312 has precision height adjustment to allow horizontal alignment of each dvLED interface bar following installation. This precision adjustment totals 10mm. Adjustable wall mounts are used in combination with interface bars, in 4 different sizes; PLB 3211, PLB 3220, PLB 3227 and PLB 3233. This product is a must-have for installations where the wall is not completely straight or if the dvLED video installation is recessed.

Dimensions in mm [inch]
Max load: 25 kg
