

002.1650 Projector fine adjustment, excl. bracket & 2x Trigger clamp

We also offer a suspension device including fine adjustment for larger projectors. With our fine adjustment screw thread mechanism it is possible to continuously pan and tilt a projector for 10 degrees. Adjustments are instant and multiple projection is easily attained, saving the valuable time of technicians on location. Fasten the projector by means of quarter turn latches (camlocks) directly to the mount. Add two trigger clamps to fasten to the truss.

Features

Weight: 5.00 kg

Colour: Black

Maximum load: 50 kg
