Turn your TV into
a design classic

Elegance and flexibility in one TV wall mount

A unique mount shaped by **40 years of experience**

It all started 40 years ago, when my father wanted to listen to his favourite jazz music but couldn't find a mount to support his speakers where he wanted them. That desire to find a better way to do things is still driving us. We are always looking for ways to make watching television, listening to music or relaxing more enjoyable.

Recently our journey brought us to a whole new level. It started when we challenged our young designers to come up with a whole new wall mount concept for premium TVs. They found inspiration in our rich design and engineering heritage. And what they came up with delighted everyone - Vogel's new DesignMount. It is a turning point for wall mount design that brings a fresh new look to the market.

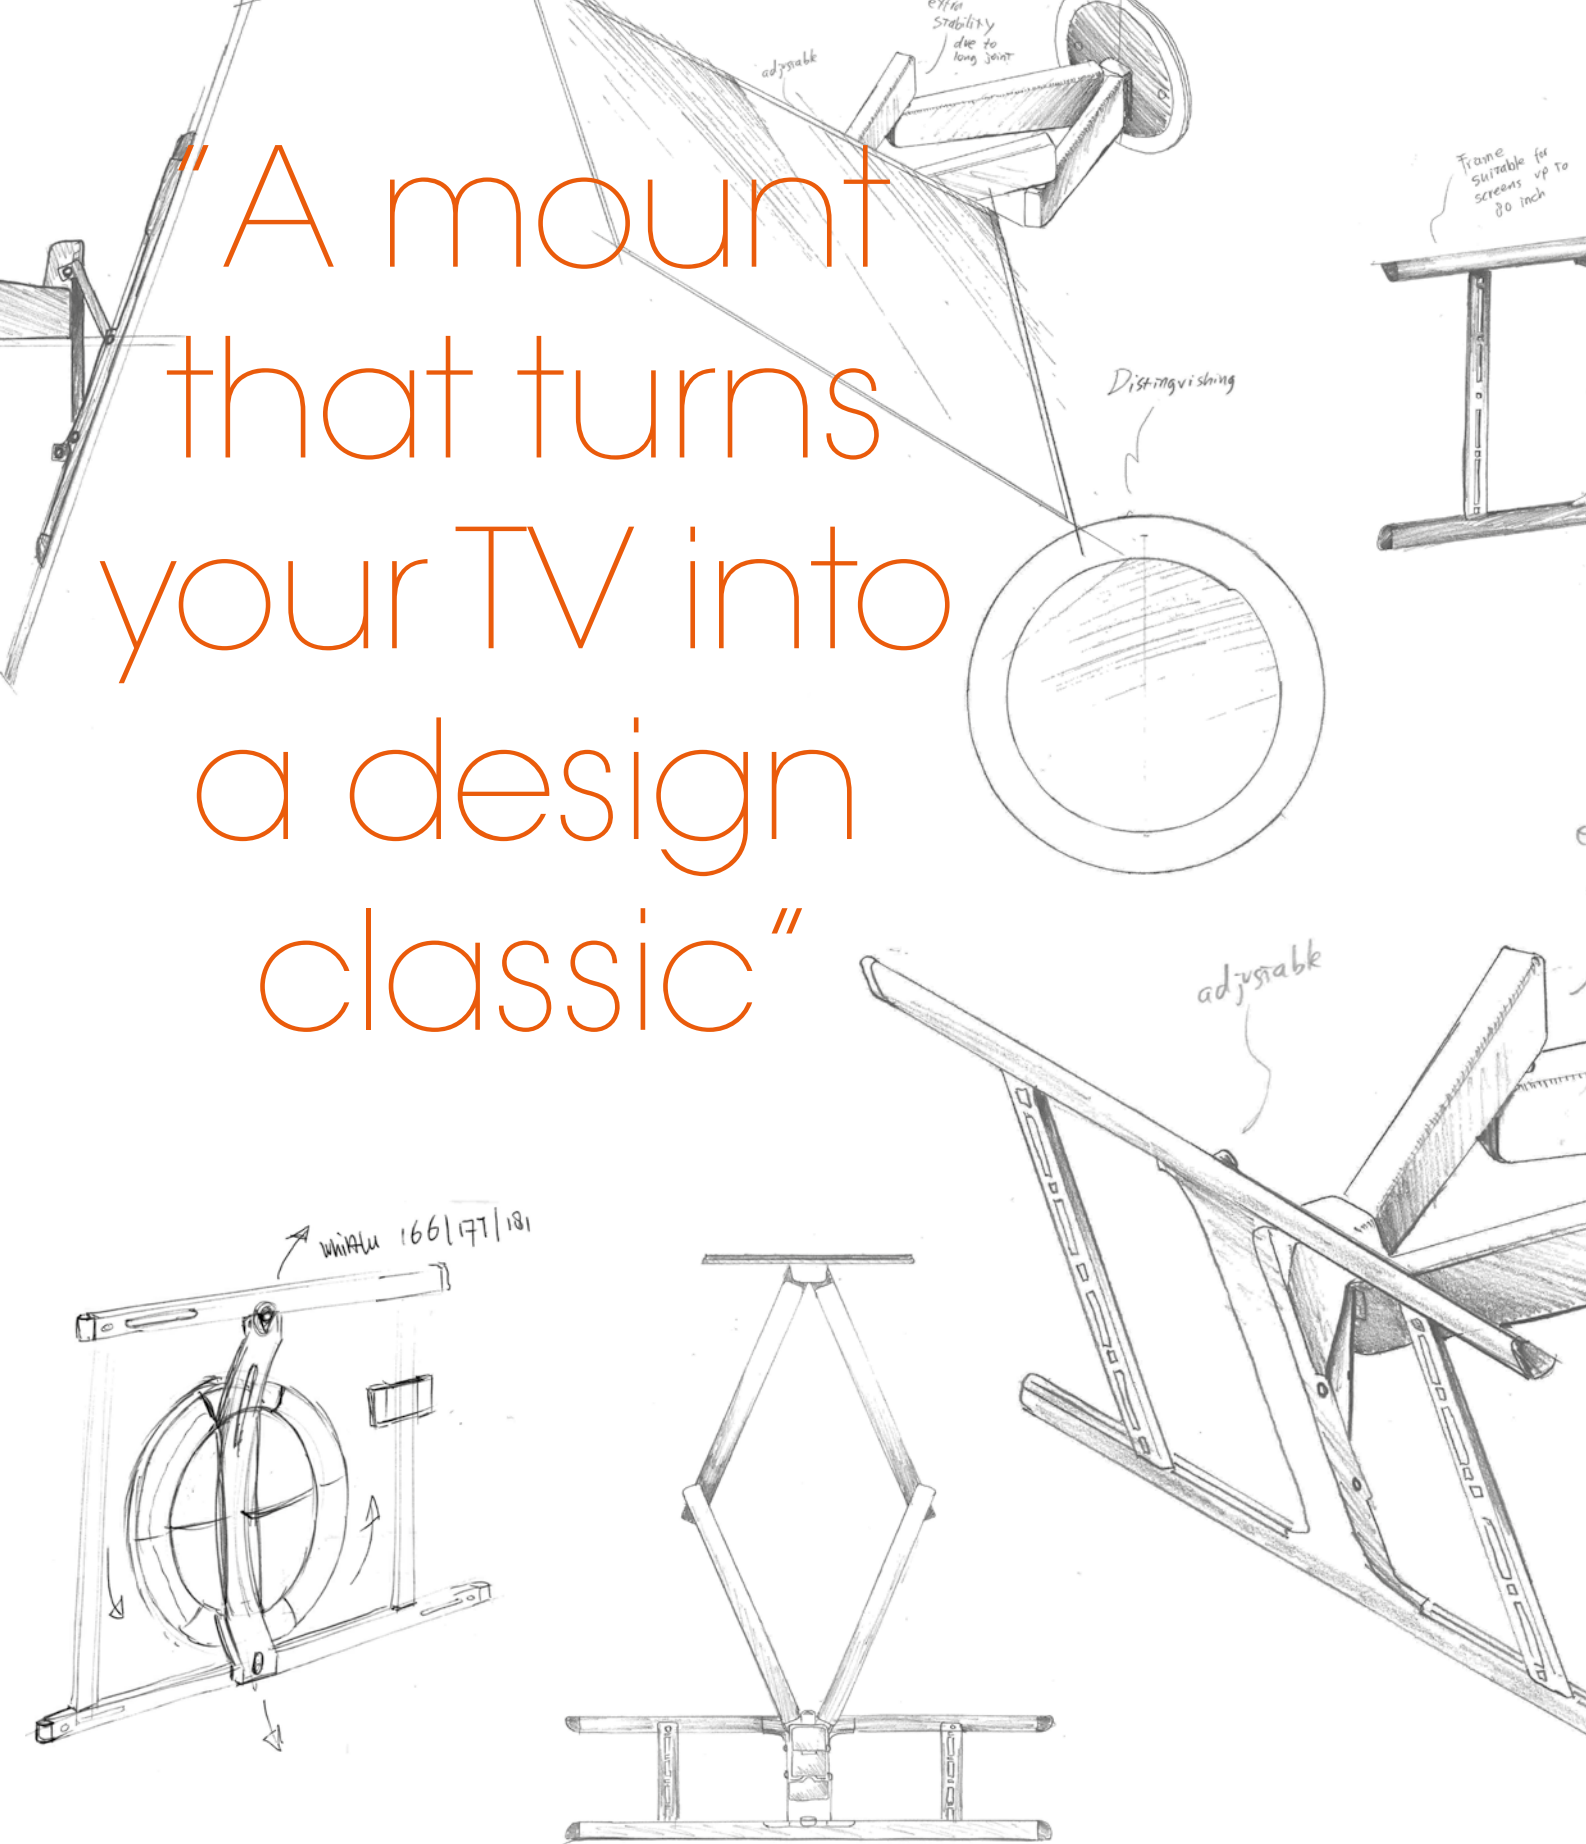

I hope that the DesignMount will appeal to design lovers who appreciate the finer things in life, and want to complement their cutting-edge TV with distinctive, finely crafted accessories. The DesignMount is pure design from back to front.

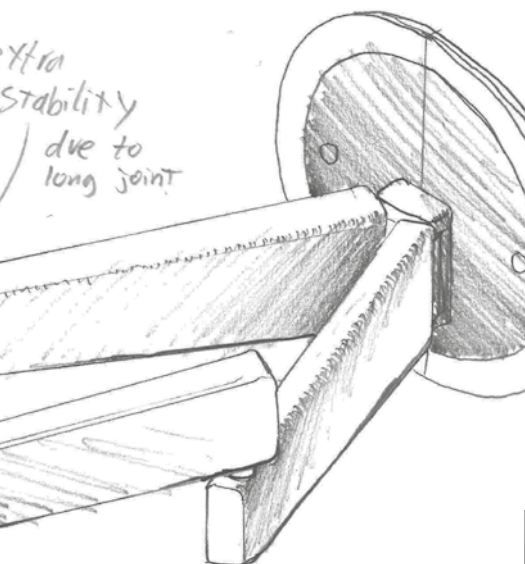

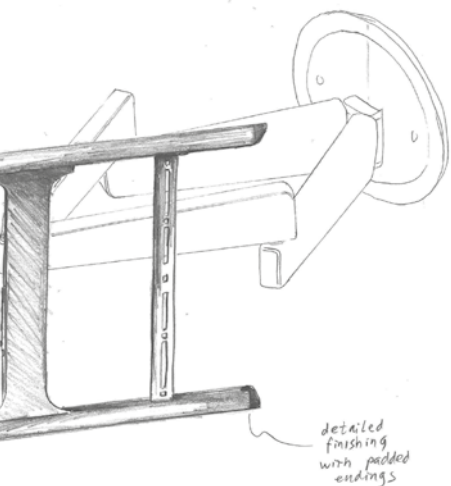

We hope you'll love using the DesignMount as much as we loved creating it.

Gerdi Vogels
CEO Vogel's

"A mount
that turns
your TV into
a design
classic"

Electronics are playing a bigger role in our lives and our interior design

When we were given the challenge to create something completely new, I knew I wanted to make a signature product for Vogel's. Something you would look at and think "Wow".

I've always wanted to design products that would last forever. That's why I love designing wall mounts. Just like other classics, Vogel's DesignMount is designed to endure. It has a clean bold look with graceful lines that creates a unique setting for a TV. People will treasure this product. And that makes me feel really proud.

Daniël Flach
Product Designer, Vogel's

designmount

materials matter

When we created this mount, we put a great bit of Vogel's legacy in it. We included our Screen Protection System, which we invented a few years ago. It protects your TV from bumping into the wall. The amazing thing about this mount is how lightly it moves. Just a tiny push from your finger can turn it. We put a lot of effort into making that work absolutely flawlessly. We call it Smart Movement.

We took all the best things from our other successful products and combined this into one new concept that looks and feels more luxurious than anything else out there.

“The new DesignMount includes
a great bit of Vogel’s legacy”

Introducing

design**mount**

pure design from back to front

The perfect entertainment system

What does the perfect entertainment system look like? Beautiful entertainment starts with Vogel's DesignMount and continues with Vogel's Cable Column, AV Multi Support or Universal Sound Bar Mount. This entire system goes together to create a unique focal point on the wall that looks great and works fantastic.

We designed it so it seems like your TV floats in the air with no cables in sight. They are neatly concealed and connected to a media player or speaker system at any height needed. The sturdy, tempered black glass of the AV Multi Support offers room for Blu-ray players, a gaming console or other equipment. You can stack several supports on the

Column to create the perfect media centre for your needs. They are the same width as the TV, because we felt that this would provide a balanced form when combined with the TV.

A Sound Bar extension can be neatly added to enhance your listening experience.

Designed and engineered in The Netherlands

With all Vogel's products, we're developing the entire product in The Netherlands. By leveraging the innovative power of our designers, we're able to build a product that radiates beauty in every detail. In other words, exactly as it was envisioned by our designers and engineers in Eindhoven.

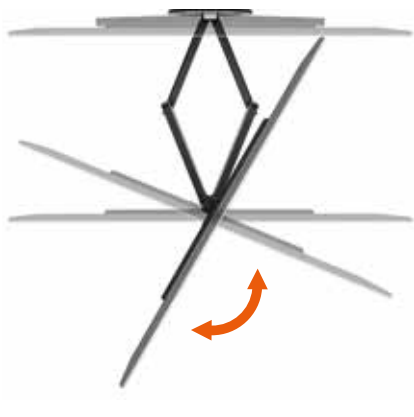

The finishing touch for every style

Bold and colourful. Light and peaceful. Whatever style you love, Vogel's DesignMount blends in naturally. Its classic timeless design creates the perfect backdrop for your entertainment system.

Let's take a real close look

Vogel's DesignMount brings a breath of fresh air to the wall mount market. We paid special attention to every detail and tried to create a wall mount which looks and feels luxurious. One look and you will always recognize it. One touch and you will love how easily it moves.

Turns up to 120 degrees
Get the best view from any point in the room.

Screen Protection System (SPS®)
Protects your TV screen at all times. No matter how far you turn it, you have the peace of mind of knowing that it will not come into contact with the wall.

Tilt up to 20 degrees
Tilt your TV up to 20 degrees for a comfortable view or to avoid light reflections on your screen.

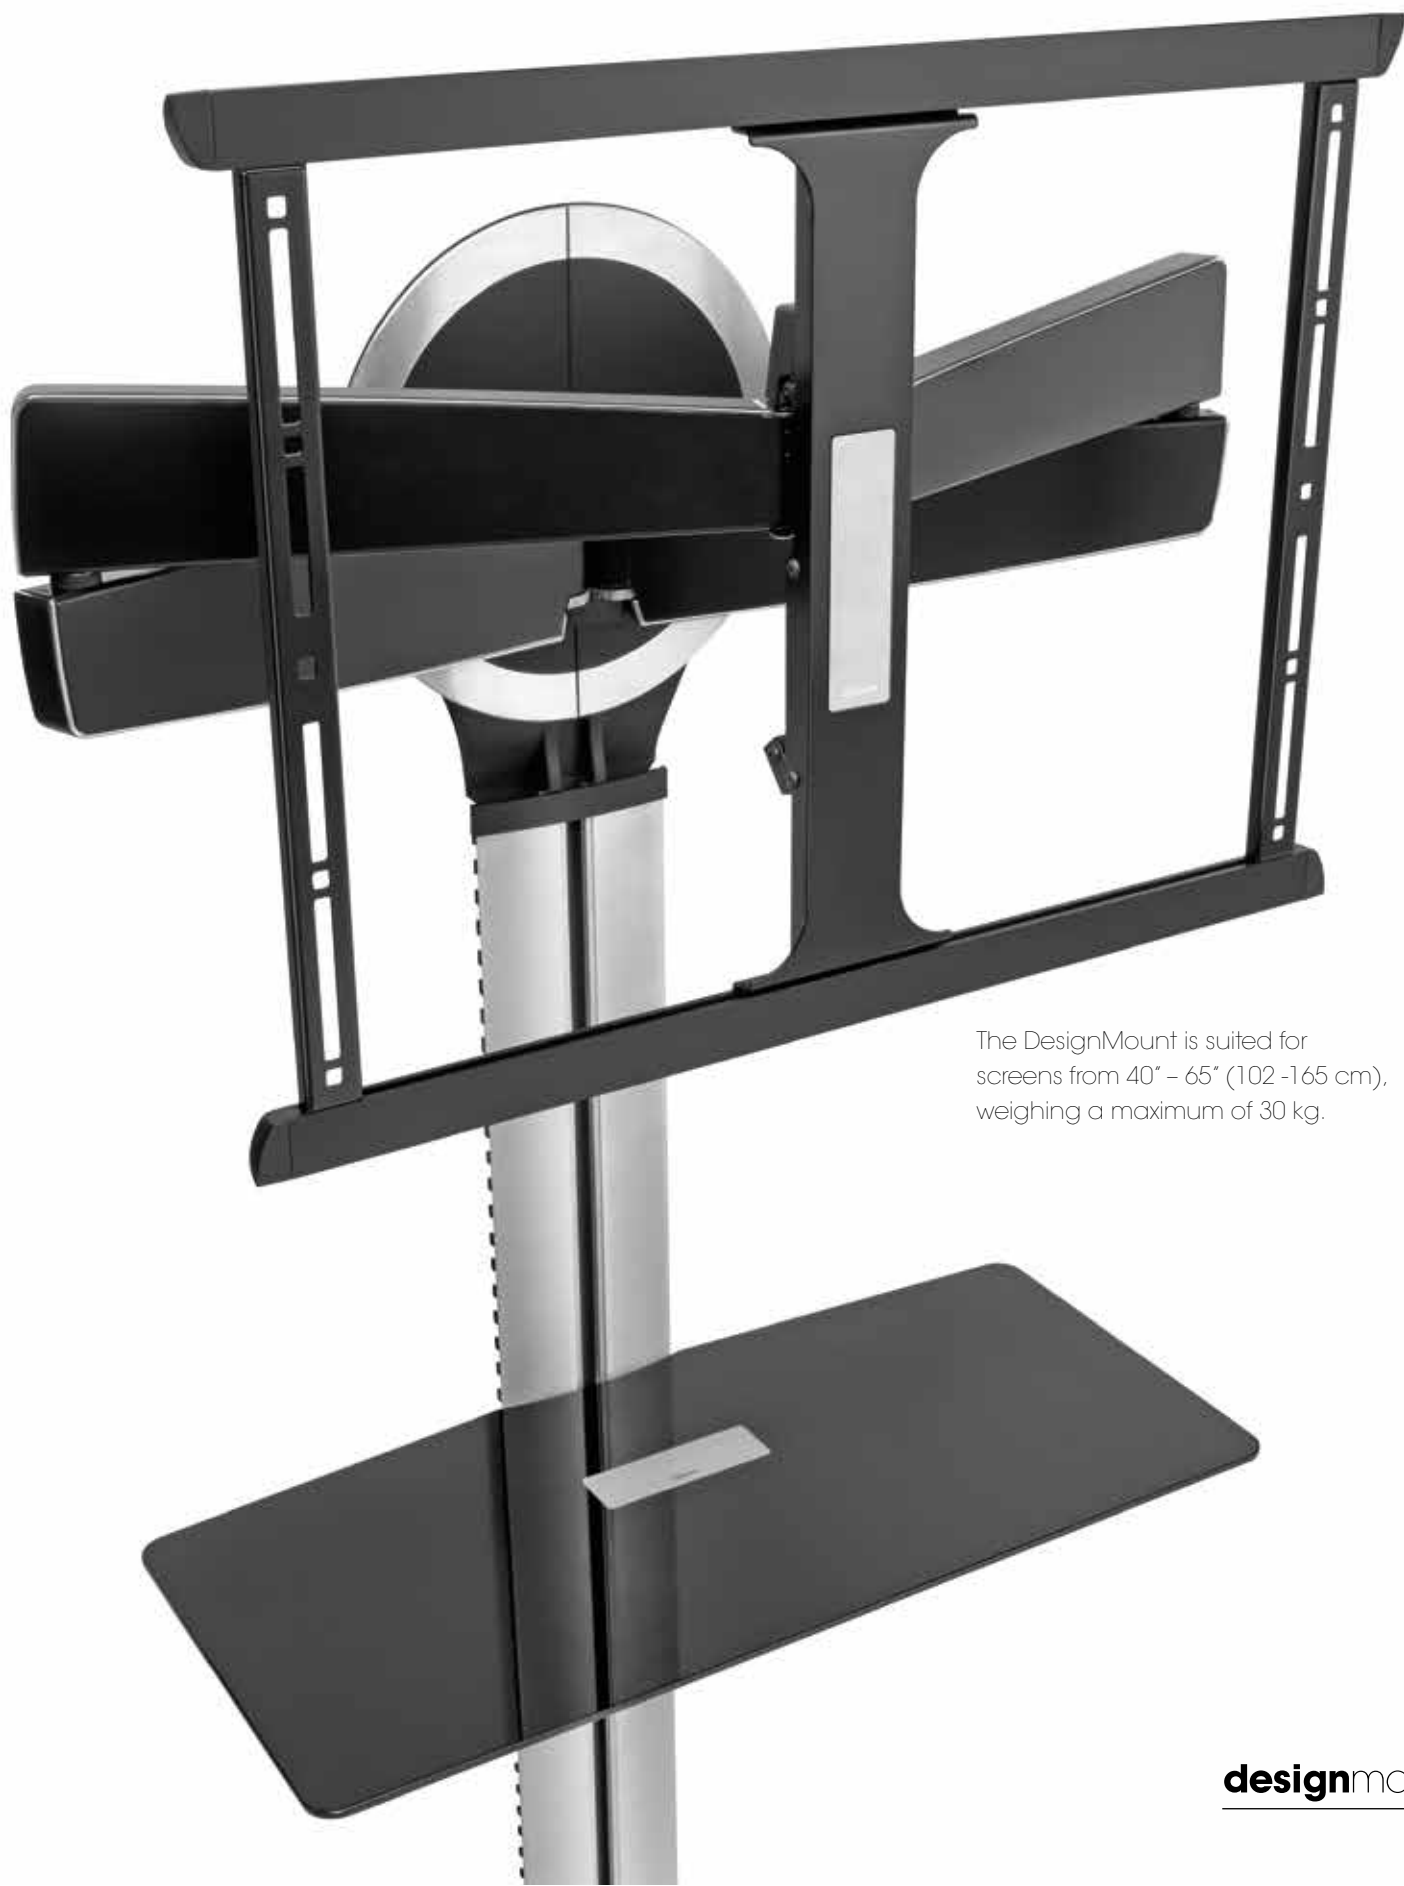

Easy adjust
We developed this product with easy mounting in mind, and put a lot of effort into helping you get a level mounting with the least amount of effort.

Smart Movement Mechanism (SMM®)
This patented feature lets you move your TV screen with the touch of your fingertip.

Hide your cables
Create a clean sleek look by concealing cables from sight.

The DesignMount is suited for screens from 40" – 65" (102 -165 cm), weighing a maximum of 30 kg.

One beautiful system

The DesignMount (NEXT 7345) folds effortlessly against the wall, leaving a minimal amount of space between the mount and the wall. Its robust frame is designed to support TVs ranging from 40" to 65" (102 -165 cm), weighing up to 30 kg.

The 100 cm long Cable Column (NEXT 7840) repeats the brushed aluminium finish of the DesignMount. It neatly conceals up to 10 cables and can be mounted at the ideal viewing height for the TV.

The advantage of Vogel's AV Multi Support (NEXT 7825) is its broad shelves. These give you a sturdy piece of furniture to hold your valuable equipment. Perfect for a Blu-ray player, gaming equipment and console, centre speaker, etc. It looks classy with its smoked black glass. You can use more than one support to stack up all your equipment.

We also created a Sound Bar solution for the DesignMount, which will complement the system. A support can be mounted on the cable column (SOUND 3400) or we offer a solution which can be added to the mount itself, so the sound can be directed to wherever you want in your room (SOUND 3450).
