

Reinforcing wall bracket floor lifts

052.7227 Reinforcing wall bracket for floor lifts 052.7200/052.7250

Product 052.7227, is especially developed for users who wish to install floor lifts 052.7200 and 052.7250 near the wall, for which the wall is very weak. This could act as replacement for the large wall plate (052.7235), or could be used when one uses the wall fixation kit (052.7230, where one cannot bolt in the floor).

Reinforcing wall bracket floor lifts

Features

Weight: 0.65 kg

Colour: Black
