

MotionMount (NEXT 7356 GB) Full-Motion Motorised TV Wall Mount ideal for OLED TVs

Article number (SKU)
Colour

8738171
Black

Key Benefits

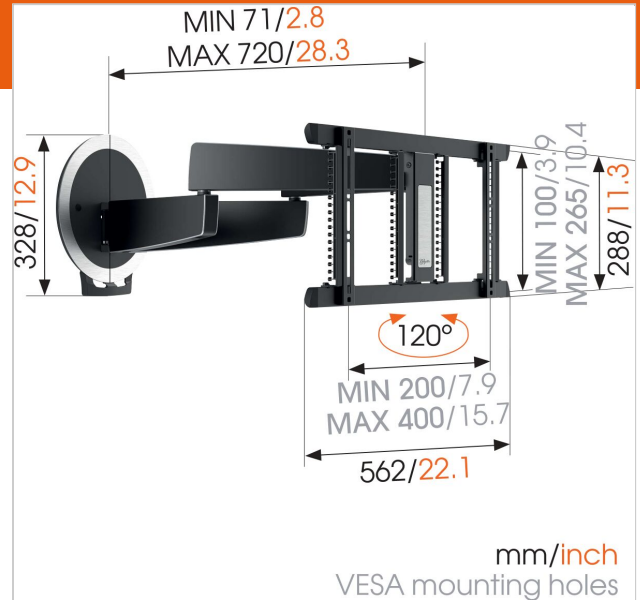

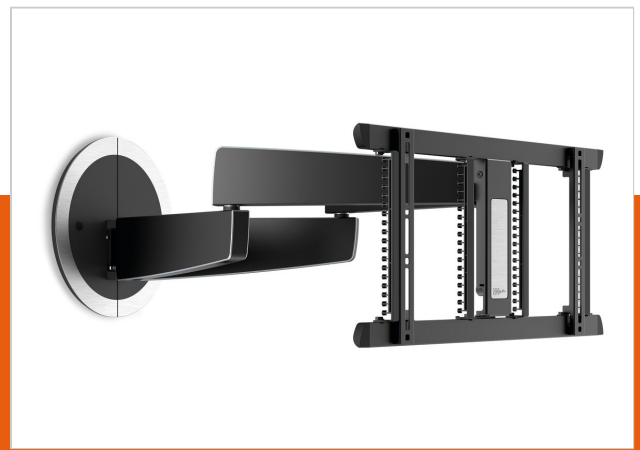

- Ideal for LG OLED TVs
- The viewing position can be adjusted at any moment, manually or with the app
- Turns automatically when the TV is switched on and off
- Up to 10 pre-programmable positions (via app)
- Easily mounted: plug & play

Add automatic movement to turn your OLED TV

Discover the specific qualities of the electronic full motion OLED TV wall mount, the OLED MotionMount (NEXT 7356). OLED TVs are thin and fragile. That's why Vogel's developed an electronic full motion OLED wall mount ideal for OLED TVs. This electronic TV wall mount automatically turns towards you, up to 120 degrees, wherever you sit in the room and it is suitable for 40-65 inch (100-165 cm) TVs with a maximum weight of 30 kg. As soon as you switch on your TV, the MotionMount moves to your preset viewing position in one smooth movement. When you turn off the TV, the OLED TV and the MotionMount gracefully move back against the wall. With this wall mount, you never need to touch your fragile OLED screen again. Even mounting and installing the OLED MotionMount is really simple. Everything is plug & play: put the plug in the socket and everything works!

Everyone can set their own viewing position

You can gain access to additional options using the smartphone/tablet app that is available free of charge in the App Store and Google Play Store. The app allows you to set one or more viewing positions for everyone in the house, up to a maximum of ten. Your OLED TV glides to the left or the right, forwards or backwards with the greatest of ease! Specially designed adapter This wall mount has been designed to fit the back of your screen perfectly. TVs can be fitted to mounts by means of a hole pattern (otherwise known as a VESA pattern) on the back. This hole pattern is positioned on the back of the screen on most OLED TVs. Our adapter is so designed that it fits this special pattern perfectly. A lot of thought has also gone into concealing the cables, particularly at the back of the TV, so that your OLED television will be even more of an eye-catcher in your home.
