

Laptop support

052.7145 Laptop support for double columned lifts with anti-collision

Accessory 052.7145, the laptop support, is suitable for placing a laptop on the double-column lifts with standard anti-collision. Mount the laptop support in the middle underneath the monitor and easily adjust the height. Cables can be fed to the lift cabinet through the hole in the top plate. Also, the support has two Neutrik connectors on the left side: users with their own laptop don't have to search for the right monitor connecting points.

Laptop support
