the **wireless** HDMI cable

MARMITEK®

Introducing: the **wireless** HDMI cable

Don't you just hate it when your meeting room is messy because there is a 20 feet HDMI cable laying around? We introduce a wire-free replacement that works just as good and just as easy as a normal HDMI cable. No app or software is required. No need to connect anything to the Wi-Fi network. Just connect it and it works. Truly plug and play.

It gets even better; the **wireless** presentation system allows you to connect up to 20 transmitters to a single receiver and supports screen mirroring from any Apple or Android device via the built-in AirPlay or Miracast function.

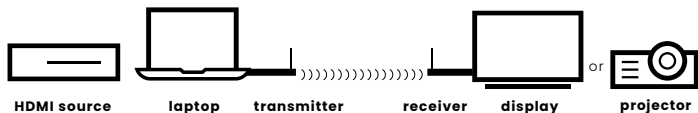

The best solution for meeting rooms, for those that don't want to spend a fortune.

Stream S1 Pro

- Replace the HDMI cable in a meeting room with a **wireless connection** between a laptop and a display or projector.
- **Plug & play:** no app or software required.
- No need to connect to a (Wi-Fi) network.
- Supports video resolutions up to Full HD 1080p/60.
- Plug the HDMI receiver into the HDMI input on your display or projector and power via a USB port.
- Plug the HDMI transmitter into the HDMI output or **USB-C** port on your laptop, **MacBook** or **Chromebook** without the use of an additional power cable.
- Turn your PC or laptop into a media center and **share content wirelessly** on a display mounted on a floor stand or wall mount.

Technical specifications:

Video resolution max. 1080p@60Hz

PC resolution max. 1920 x 1080

HDMI standard HDMI 1.4 / HDCP 1.3

Audio formats PCM stereo

Operational frequency 5 GHz
