Key Benefits

- Manual operating with electrical support (DirecControl®)
- Height adjustment range of no less than 700 mm
- TÜV and CE certified
- Option for whiteboards & various accessories
- Anti-collision on the display lift prevents damage

Motorized display lift trolley, manually operated, for 86 inch display

This RISE 4200 DirecControl® electrically assisted display lift trolley is a flexible mobile solution. This manually operated display lift with electrical assistance is suitable for screens up to 86 inches with a maximum weight of 100 kg. Larger screens can also be mounted, but in some cases require a software-based height restriction. This trolley is height-adjustable up to 700 mm, has a universal VESA size up to 800x600, and can support loads of up to 120 kg when combined with whiteboards, for example. Thanks to the open H-frame frame on (braked) casters, the lift is easy to move between rooms.
