

## PLA 9301 Bracketkit PLB 31xx

### Key Benefits

- Easy installation

The PLA 9301 consists of a nut strip and two brackets. This product is used to mount the PLB 31xx dvLED interface bar to a PUC 29xx tube. The nut strip is inserted into the PUC 29xx tube. The design of the flexible nut strip keeps it clamped in the tube after insertion. The two brackets simply snap onto the PLB 31xx dvLED interface bar. After installation, the brackets are easily moved to the desired width. Installing a dvLED video wall on PUC 29xx tubes is easier and much faster thanks to the design of the PLA 9301!
